[] Continuation Sheet Attached					

Brief Description of Arguments to be Presented:

The applicant asks for examiner's proposals of amendments to the claims 1-6,9 and 10 to remedy any formal errors mentioned in Office Action of 12/12/2006, provided said remedies don't change the sense of the invention.

An interview was conducted on the above-identified application on 01/04/2007.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

Reply to the Office Action of Dec. 12, 2006

Substance of the Interview

In reply to the Office action of 09/20/2006 Claims 1-6, 9 and 10 have been currently amended regarding remarks of examiner (refer to points 6-12 in the examiner's letter) and in compliance with suggestions and requirements of at least 37 CFR § 1.116, 35 U.S.C. §112, 37 CFR §1.75 and 37 CFR §1.77 (b). **Claim 7 was canceled.**

The additional explanations of terms and definitions have been given in response to the editorial notes of Expertise represented by points 6-12 in Office action letter mailed on Sept. 20, 2006.

No new matters have been entered.

The said amendments to the Claims haven't changed the sense and art of the invention whereas in accordance with 37 CFR §1.75 (d)(1) those amendments enabled the Claims 1-6,9 and 10 to conform to the invention. The used in the claims the standard or conventional terms and definitions, and explanations of this innovative method have got the antecedent basis in the Specification and Drawings of the present invention "Method of Defense-in-Depth Ultrasound Intrusion Detection".

In its Advisory Action (see Office Action of 12/12/2006) the Expertise concluded that: "Due to the numerous errors in the claims, claims do not particularly point out and distinctly define an invention". Since the applicant hopes that the mentioned errors feature the editorial format, the applicant asks for the interview and authorize the examiner to propose the relevant amendments. The Interview Request Form [PTOL-413A (09-06)] is attached hereto.

Respectfully submitted, CTRL Systems, Inc.
